

# DATA ENGINEER

Latsco Shipping Ltd., located in the north suburbs of Athens is looking to recruit a Data Engineer to join the Group IT Department, reporting to the Business Applications Manager.

Latsco Shipping was originally established in the 1940s when the company's founder, Captain John Latsis, first ventured into passenger and commercial shipping. In line with our core values we strive for business excellence and customer satisfaction, maintaining the ethos, passion and vision of our founder. We care about our people and their wellbeing and nurture a fair culture that promotes equal opportunities, continuous development and participation, being a Great Place to Work Certified Company. We are headquartered in Monaco with offices in London and Athens.

## Position Responsibilities

- Design, develop, and maintain data pipelines and data models to extract, transform and load data from various sources into data warehouses or data lakes for reporting, data analytics and machine learning
- Develop and/or enhance data-driven solutions that drive operational and strategic decision-making
- Collaborate with business stakeholders to understand their business needs, provide technical guidance and interpret trends and patterns
- Assist in building complex algorithms and predictive models that provide unique knowledge and actionable insights to the business
- Model front-end and back-end data sources to enable powerful data analysis
- Identify ways to improve data reliability, efficiency and quality
- Identify, analyse, and interpret trends or patterns in complex data sets and automate repetitive data handling processes
- Implement data integration solutions, including APIs, messaging systems, and batch processing, to ensure seamless data flow between different systems and platforms
- Develop data visualisation/exploration tools or advance existing tools
- Stay up to date with emerging technologies, tools, and trends in the data engineering field, evaluating and recommending new solutions that can improve data flow and transformation process

## Candidate Profile

- Degree in Computer Science, Information Technology or Engineering
- 3+ years of working experience as a software or data engineer, working with Python and Django
- Working with relational databases and SQL, ideally PostgreSQL, is required
- Working with Git and CI/CD best practices, is required
- Experience in Java
- Experience with NoSQL databases
- Experience with configuration of CI/CD tools, specifically Gitlab CI and/or Jenkins
- Experience in Linux administration
- Understanding of HTML /CSS/Javascript, will be considered a plus

- Understanding of PowerBI, Tableau, or other similar tools, will be considered a plus
- Understanding of data pipelines and ETL tools, such as Spark, Airflow, etc., will be considered a plus
- Fluency in both written and oral communication in English
- Ability to learn new technologies
- Cooperative with positive and strong teamwork attitude
- Excellent customer service skills

## **REMUNERATION PACKAGE**

- Competitive compensation package including performance related annual bonus
- Pension plan and medical scheme
- Career development opportunities in a high standards working environment
